YOUR PENSION AT A GLANCE

Value of pension pot as at 5 April 2025

£61,731.40

Your investments have increased or decreased in value
(after charges)

£9,240.74

Value of pension pot as at 5 April 2026

£70,972.14

WHAT YOU MIGHT GET BACK (ILLUSTRATION DATE 08 MAY 2026)

Your projected pension pot at retirement is	£74,800
Which could buy you an estimated taxable yearly pension of	£5,000
These figures are shown in today's prices and allow for how the price of goods and services might increase in future. We have made some assumptions about the pension you could buy at retirement. In particular: - No further contributions will be made to the Plan by you or the Company before your selected retirement age. - The likely performance of the fund. - When you turn your pension pot into an income by buying an annuity, you do not take a lump sum, your income will remain level, and you do not want an annuity that will provide an income for your spouse after you die.	

What happens may be different from what we have assumed so these figures are a guide to help you plan. We cannot guarantee the actual amount of money you, or anyone else who benefits from your Plan membership, will get and you could get less or more than the amount shown on your statement.

More information about assumptions can be found at: www.pearson-pensions.com/benefit-statements

Keep in touch

Are your details correct? How about your retirement date? Having an accurate retirement age will help us contact you at the correct time. If you are in one of our Lifecycle options, this will also help ensure your pension pot is invested in the appropriate funds.
